SUMMARY

Final year B.Tech student in Electronics and Computer Science Engineering with strong foundations in **Java, Python, networking, operating systems and cybersecurity fundamentals**. Passionate about network security vulnerability assessment and secure software development. Interested in penetration testing, security automation and cybersecurity research while leveraging programming skills to build secure applications.

AT PRESENT

B.Tech in Electronics and Computer Science Engineering
Kalinga Institute of Industrial Technology (KIIT), Bhubaneswar, Odisha

Jul 2024 – May 2027
CGPA: 8.53/10

EDUCATION

Diploma in Electrical and Electronics Engineering
University Polytechnic, BIT Mesra, Ranchi

Aug 2021 – May 2024
CGPA: 8.59 /10

TECHNICAL SKILLS

- **Languages:** C, Java, Python
- **Frontend:** HTML, CSS, JavaScript, React.js
- **Backend:** Node.js
- **Databases:** MySQL, SQL
- **Networking:** TCP/IP, HTTP, DNS, OSI Model
- **Tools & Platforms:** Git, GitHub, VS Code, Google Colab, Wireshark
- **Others:** Communication Skill, Problem Solving, Analytical Thinking, Team Collaboration, Quick Learner

EXPERIENCE

Apr 2025 – Jun 2025

Web Full Stack Developer Virtual Intern – AICTE – EduSkills Academy (Supported by AICTE, National Internship Portals)

- Successfully completed a 10-week Web Full Stack Developer Virtual Internship focused on modern web development technologies and industry practices.
- Built and enhanced responsive web applications using HTML, CSS, JavaScript, React.js, and backend Node.js with MySQL database.
- Worked on front-end development, component-based UI design, routing, state management, and REST API integration.
- Strengthened knowledge of software development lifecycle (SDLC), problem-solving, and industry best practices through project-based learning.

PROJECTS

Network Packet Analyzer: Python, Scapy, Wireshark

July 2026

- Developed a network packet analyzer using Python and Scapy to capture and inspect live network traffic.
- Parsed packet headers including IP, TCP, UDP, ICMP, and HTTP protocols to identify network communication details.
- Implemented protocol-based filtering and packet statistics for real-time traffic analysis.
- Generated packet logs to assist in network troubleshooting and basic security monitoring.

Vehicle Speed Detection: Java, Python, Node.js, MySQL, REST APIs, AWS

May 2026

- Built a real-time Vehicle Speed Detection System using Python, Java, and React.js with image processing and backend integration.
- Developed a web dashboard using Node.js, MySQL, and REST APIs for monitoring and data analysis.
- Deployed on AWS with CI/CD pipelines for scalability and real-time processing.

Dental Appointment Management System: LangGraph, Python, Grok-4 (xAI)

Feb 2026

- Developed a multi-agent conversational AI system for managing dental appointments.
- Implemented intelligent routing using a supervisor agent for booking, cancellation, rescheduling, and appointment inquiries.
- Built a chat-based interface using LangGraph and Grok-4 to enable natural language interactions.

CERTIFICATIONS

- 🎓 **Web Full Stack Developer** - EduSkills
- 🎓 **AI-ML** - Google, EduSkills
- 🎓 **Data Analytics** - CISCO Networking Acedmy
